**Bachelor of Science (Computer Science & Information
Technology)**

Semester:	5	Academic Year:	2025-26
Course Name:	Software Project Management	Course Code:	3040243301

Question bank

Sr. No.	Question Text	Marks	CO
Unit No : 3			
1	Define Risk Management in software project management.	2	3
2	List any two objectives of risk management.	2	3
3	What is meant by a Risk Register?	2	3
4	State two components of an Enterprise Risk Database.	2	3
5	Define outsourcing in the context of acquiring software projects.	2	3
6	Mention two key elements of a Request for Proposal (RFP).	3	3
7	Write any two differences between RFP and RFI.	3	3
8	What does SOW stand for? State its purpose.	3	3
9	Define Benchmarking in simple terms.	3	3
10	List any two types of benchmarking.	3	3
11	Define Risk Management in software project management.	4	3
12	List any two objectives of risk management.	4	3
13	What is meant by a Risk Register?	4	3
14	State two components of an Enterprise Risk Database.	4	3
15	Define outsourcing in the context of acquiring software projects.	4	3
16	Mention two key elements of a Request for Proposal (RFP).	5	3

17	List any two types of benchmarking.	5	3
18	Discuss the strategies used for risk response planning.	5	3
19	Explain the role of outsourcing in acquiring software projects. Mention its benefits and risks.	5	3
20	Describe in detail the structure of an RFP.	5	3
21	Explain the process of creating a Statement of Work (SOW).	5	3
22	Compare Competitive Benchmarking and Functional Benchmarking with examples.	5	3
23	Discuss the entire Risk Management Process with a neat diagram.	5	3
24	Explain the complete process involved in awarding a software project contract.	5	3
25	Analyze the importance of best practices in proposal writing with an example.	5	3
26	Discuss different benchmarking approaches and their advantages in software project management.	5	3
27	Define CMMI in software project management.	2	3

28	What is meant by a Process Area in CMMI?	2	3
29	List the five maturity levels of CMMI.	2	3
30	What does SCAMPI stand for in CMMI appraisal?	2	3
31	Mention two benefits of adopting CMMI.	2	3
32	Write one difference between CMM and CMMI.	2	3
33	Discuss in detail the CMMI framework, its process areas, and maturity levels.	5	3
34	Explain the steps of CMMI adoption and its impact on software project management.	5	3
35	Analyze the advantages and limitations of CMMI implementation in organizations.	5	3
36	Compare CMMI and CMM comprehensively with examples.	5	3
37	Risk management primarily deals with: a) Increasing profits b) Identifying and mitigating project threats c) Writing user manuals d) Marketing software	1	3
38	Which of the following is a risk response strategy? a) Acceptance b) Mitigation c) Transfer d) All of the above	1	3
39	RFP is issued to: a) Request general vendor information b) Request detailed proposals from vendors c) Define project scope after contract award d) Benchmark competitor products	1	3
40	Which of the following is NOT a type of benchmarking? a) Internal b) Competitive c) Generic d) Financial Audit	1	3
41	The highest level of CMMI maturity is: a) Managed b) Defined c) Quantitatively Managed d) Optimizing	1	3
42	SCAMPI is related to: a) Software outsourcing b) Risk register maintenance c) CMMI appraisal d) Benchmarking	1	3
43	CMM focused only on: a) System engineering b) IT services c) Software development d) Outsourcing contracts	1	3
