

**SILVER OAK
UNIVERSITY**
EDUCATION TO INNOVATION

**School of Technology, Design and Computer
Application
College of Computer Application
Bachelor of Science (Computer Science & Information
Technology)**

Semester:	5	Academic Year:	2025-26
Course Name:	Software Project Management	Course Code:	3040243301

Question bank

Sr. No.	Question Text	Marks	CO
Unit No : 4			
1	What is Unit Testing? Explain its purpose.	2	4
2	Define Software Maintenance. Mention its types.	2	4
3	Define Project Maintenance. Why is maintenance required after software deployment?	2	4
4	What is the Software Maintenance Life Cycle (SMLC)? List its key phases.	2	4
5	What is Transaction Flow Testing? Give a simple example.	2	4
6	What is Web-Based Testing? Explain challenges involved in it.	3	4
7	Explain the concept of Software Reuse and its advantages.	3	4
8	Write a note on Benchmarking and Certification in software quality.	3	4
9	Explain the importance of Coverage vs. Usage-based testing.	3	4
10	Discuss different types of Software Testing: Unit Testing, Integration Testing, and System Testing with examples.	3	4
11	Describe the process and methodology of Test Case Generation. Provide an example of a test case format.	4	4
12	Explain Control Flow Testing and Data Flow Testing with examples.	4	4
13	Explain the process and importance of Defect Prevention in maintenance projects.	5	4
14	Design a simple test plan for an object-oriented system including unit, integration, and system testing.	5	4
15	Discuss Software Aging. What are its causes and how can it be prevented?	5	4
16	Assume you are maintaining a large web-based system. Describe how you would plan testing using tools like Selenium, JMeter, and Postman	5	4
