Question bank

Sr. No.	Question Text	Marks
Unit No : Unit 1 & Unit 2 & Unit 3		
1	Which pattern does Django follow? a) MVVM b) MVC c) MVP d) MVT	1
2	In Django, models are defined in which file by default? a) views.py b) models.py c) urls.py d) forms.py	1
3	Which command is used to create migrations in Django? a) makemodel b) makemigrations c) migratecreate d) startmigration	1
4	The Django admin interface can be customized by modifying which file? a) admin.py b) models.py c) views.py d) settings.py	1
5	Which method is used to save a model instance in Django? a) store() b) insert() c) save() d) commit()	1
6	In Django, the `render()` function is used to: a) Execute queries b) Send email c) Render templates with context d) Create models	1
7	Which HTTP method is used for updating an object in CRUD operations? a) GET b) POST c) PUT/PATCH d) DELETE	1

8	In Django, uploaded files are stored using the settings variable: a) MEDIA_URL b) MEDIA_ROOT c) FILE_PATH d) STATIC_ROOT	1
9	Which Django module handles user login and logout? a) django.auth b) django.contrib.auth c) django.sessions d) django.user	1
10	Which Django framework is used to display temporary success or error messages? a) Toasts b) Alerts c) Messages framework d) Notifications	1
11	Django signals are primarily used for: a) Inter-process communication b) Triggering actions on certain events c) Debugging d) Logging	1
12	In DRF, serializers are used for: a) Database migrations b) Converting complex data to JSON/XML c) Rendering templates d) Handling sessions	1
13	Which serializer type allows nested relationships in DRF? a) BasicSerializer b) NestedSerializer c) ModelSerializer d) HyperlinkedSerializer	1
14	In DRF, ViewSets combine: a) Models and Templates b) Views and Routers c) CRUD operations into a single class d) Signals and Middleware	1
15	DRF Routers are used to: a) Manage templates b) Automatically generate URL patterns for ViewSets c) Handle database queries d) Manage signals	1
16	Which DRF class controls access to API endpoints? a) Views b) Routers c) Permissions d) Middleware	1
17	JWT stands for: a) Java Web Tokens b) JSON Web Tokens c) JavaScript Web Transport d) JSON Writable Type	1
18	Which DRF package is used for JWT Authentication? a) django-rest-framework-jwt b) django-jwt-auth c) rest_framework_simplejwt d) jwt-drf	1
19	The default HTTP method allowed in DRF ViewSets is: a) GET b) POST c) GET, POST, PUT, DELETE d) Only GET and POST	1

20	In DRF, the 'is_authenticated' attribute belongs to: a) request.user b) request.session c) serializer.data d) view.router	1
21	In Django, which signal is triggered after a model instance is saved? a) pre_save b) post_save c) save_signal d) after_save	1
22	In DRF, which permission class grants read-only access to unauthenticated users but write access to authenticated users? a) IsAuthenticated b) IsAdminUser c) AllowAny d) IsAuthenticatedOrReadOnly	1
23	Which file in an Odoo module defines the basic metadata (name, version, dependencies)? a) __init__.py b) __manifest__.py c) models.py d) views.xml	1
24	Which relational field in Odoo defines a many-to-one relationship? a) Many2many b) Many2one c) One2many d) Char	1
25	Which Odoo view type is used to display data in a tabular format? a) Kanban b) Form c) Tree d) Calendar	1
26	Which decorator is used in Odoo to compute field values dynamically? a) @onchange b) @compute c) @depends d) @model	1
27	In QWeb templates, which symbol is used for dynamic value rendering? a) {% %} b) [[]] c) t-esc d) <? ?>	1
28	Which relational field is used when a record can have multiple associated records in both directions? a) Many2one b) One2many c) Many2many d) Char	1
29	Which of the following is true about @api.onchange in Odoo? a) It is triggered when the record is saved b) It is triggered immediately after a field value changes c) It computes values automatically on all records d) It replaces @compute decorator	1
30	In Odoo, which file is mandatory to load views? a) controllers.py b) __init__.py c) XML file inside views/ folder d) README file	1
31	What does MVC stand for in Django context?	2
32	Which command applies migrations in Django?	2
33	What is the role of 'ModelSerializer' in DRF?	2

34	Name two built-in authentication classes in DRF.	2
35	What is the default port for Django's development server?	2
36	What is the purpose of the <code>__manifest__.py</code> file in an Odoo module?	2
37	Differentiate between Many2one and One2many relational fields.	2
38	What is the purpose of the <code>__manifest__.py</code> file in an Odoo module?	2
39	Differentiate between Many2one and One2many relational fields.	2
40	What is the use of <code>__init__.py</code> in an Odoo module?	2
41	What is the use of Django signals? Give one example.	3
42	Define <code>'MEDIA_ROOT'</code> and <code>'MEDIA_URL'</code> in Django.	3
43	List different types of Permissions in DRF.	3
44	What is a Router in DRF?	3
45	Mention two advantages of using JWT Authentication.	3
46	Explain the use of computed fields in Odoo with an example.	3
47	Write a short note on inheritance in Odoo views.	3
48	Explain the use of computed fields in Odoo with an example.	3
49	Write a short note on inheritance in Odoo views.	3
50	Describe the use of QWeb templates in Odoo reporting	3
51	Differentiate between Django Models and Migrations.	4
52	Write steps to customize Django Admin interface.	4
53	Explain CRUD operations in Django using Forms.	4
54	Describe Permissions in Django REST Framework with an example.	4
55	Explain the use of Nested Serializers in DRF.	4
56	Describe different Odoo view types (Tree, Form, Kanban) with suitable use cases.	4
57	Explain the use of <code>@api.onchange</code> decorator with an example.	4
58	Describe different Odoo view types (Tree, Form, Kanban) with suitable use cases.	4
59	Explain the use of <code>@api.onchange</code> decorator with an example.	4
60	Explain the difference between model inheritance (<code>_inherit</code>) and class inheritance in Odoo.	4
61	Explain Django's MVT architecture with a diagram.	5
62	Describe the process of creating and applying migrations in Django.	5
63	Explain the steps to implement file upload in Django with media management.	5
64	Discuss Django's authentication system for login and logout functionality.	5
65	Explain Django REST Framework's ViewSets and Routers with an example.	5
66	Describe JWT Authentication using <code>'djanoestframework-simplejwt'</code> with setup steps.	5

67	Explain the role of Django templates in the MVT architecture with an example.	5
68	Describe the process of creating a custom user model in Django.	5
69	Explain how to handle file validation in Django forms.	5
70	Write token-based authentication vs session-based authentication in Django REST Framework.	5
71	Write the steps to implement API versioning in Django REST Framework.	5
72	Discuss the structure of an Odoo module with examples of essential files.	5
72	Explain relational fields in Odoo (Many2one, One2many, Many2many) with practical examples.	5
73	Discuss the structure of an Odoo module with examples of essential files.	5
74	Explain relational fields in Odoo (Many2one, One2many, Many2many) with practical examples.	5
75	Explain the process of creating a custom report in Odoo using QWeb templates.	5
